

USMap™ **Object-Oriented GIS for Utilities**

GIS Implementation has never been easier!

Completely User Configurable!

USMap™ is a rules based, object-oriented GIS complementing the Autodesk Map product series with a user-configurable set of tools to model and define objects specific to your environment. Electric, Gas, Water, CATV. whatever, **you build** and integrate the system to suit the GIS mapping, maintenance, workflow and application needs of **your organization**.

Powerful, Full-Featured GIS

USMap™ supports **full network connectivity modeling**, including filtered flow tracing and switching. USMap™ provides feature placement via **COGO**, digitizing, or **GPS**; object-level rule validation, and many other tools you'd only expect in products costing twice as much.

Easy to Integrate! MultiSpeak® 1 Compliant System

Compatibility!

USMap™ works with **your** existing Autodesk® compliant databases such as Microsoft® Access® and Oracle®, so you don't need to change a thing! **Your existing forms**, tables, queries, reports, related applications, are all easily linked to USMap® through the user configuration menu. **USMap™** is **100% tested MultiSpeak® compliant**, saving participating utilities **thousands of dollars** in application integration costs. Using no proprietary code or languages. and only **industry standard** graphics and data formats, **USMap™** is easy to integrate with all other compliant GIS environments as well. Ask our staff about installations seamlessly sharing data with **ESRI!**

Low-Impact System Upgrade!

USMap™ is an upgrade from existing AutoCAD® - based GIS or mapping systems, and was **recommended by Autodesk** as an upgrade for their discontinued **GenMap System**. The product converts attribute, extended entity, or object data to database records and builds CAO pointers to your facility and consumer tables, while disposing of redundant data. **Standardized systems are upgraded within two weeks.**

Training and Support

USMap™ comes with the **first year of 3 time zone internet support!!** USC also offers on-site training, as well as regularly scheduled web-based training to further control costs.

Free Demo and Test Drive!

To arrange a no-cost web-based demo, and/or receive a free trial version of the product to try-before-you-buy, call **970-224-9316** today, or visit us online at: www.utilitysciences.com
